Projects

- **Nepali Stay – Online Hotel Booking System**

Tech Stack: HTML, CSS, Bootstrap 5, AJAX, JS, jQuery, PHP, MySQL

- Hotel booking system for individual Hotels of Nepal with proper admin panel
- Have full control and power who adopt this system as accordance to them
- Github repo: https://github.com/GowinG7/Nepali_stay.git

- **Online Shopping Cart with eSewa Payment Integration**

Tech Stack: HTML, CSS, PHP, MySQL

- Allows users to browse, add to cart, and order products.
- Integrated payment system with eSewa sandbox for testing.
- Admin can add the products with required details
- Github repo: https://github.com/GowinG7/basic_shopping_cart.git

- **CRUD System with Live Search and Validation**

Tech Stack: HTML, CSS, PHP, MySQL, jQuery

- Implemented CRUD operations with live search functionality
- Includes client-side (jQuery) and server-side (PHP) validation.
- Github repo: <https://github.com/GowinG7/misTPS.git>

- **Simple Calculator**

Tech Stack: HTML, CSS, JS

- Basic operation like addition, subtraction, multiplication, division
- Live demo: [Simple Calculator](#)

- **Jersey E-Mart**

Tech Stack: Html, CSS, Bootstrap 5.3, JS , JQuery, PHP, MySQL

- It is the online system for selling Jerseys which focuses only on the Nepal jerseys (Nepal football league, Nepal Cricket League, Nepal National team jerseys)
- Github repo: <https://github.com/GowinG7/Jersey-E-Mart.git>

- **SpendWise (Android Application)**

Tech stack: XML(for layout structure), SQLite, Java

- It is the simple android application to track the daily incomes and expenses so that we can spend our income wise and systematically. We can add our income and expenses and also edit and delete if required. It shows today's balance, today's total income, today's total expenses and we can also see our expenses as selected date
- Github repo: <https://github.com/GowinG7/Income-Expenses-tracker.git>

- **Employee Record Management**

Tech Stack: Java(Swing, JDBC, table layout managers) , Mysql

- It is simple basic employee record management system which has basic login authentication (username and password), logout without session and CRUD operation implementation.
- Github repo: <https://github.com/GowinG7/RecordManagementSystem.git>

- **CV Generator**
